Education

Professional Year   **Apr 2020 - Current**
Performance Education, City

Key Subjects: Australian Business Culture and Environment, Achieving Career
Success, Australian Workplace Skills and Professional Business Communication

Master of Information and Communication Technology   **March 2020-Nov 2021**
University of Sunshine Coast, Melbourne, Australia
Special interest in Software Development

Bachelor of Computer Science and Engineering   **Apr 2013 – Jun 2017**
Punjab Technical University, Punjab, India
Key learning areas included: OOPS, RDBMS, Web Development

University Project

Emergency Management   **July 2021 – Oct 2021**
University of Sunshine Coast, Melbourne, Australia

Objective: The goal of the project was to build an automated system of health management system using AWS face recognition latest cloud API which was highly focused on saving the health of an individual when an injury has occurred.

Tools: A waterfall method is effectively used in this project which is efficiently managed with the latest tool called Jira.

Duties: A group project in which as a team leader I am responsible for time management and fully accountable for connecting a Back-end with a front-end which ends up with an interactive user interface. I was also responsible for committing the code to GitHub and fixing the bugs and encouraging teammates who do not belong to a programming background which adds up their new skills.

Outcome: we end up with a smooth-running hybrid app that is ready to use in the market to promote the health management system which we completed by the given deadline.

Result: Obtained High Distinction
